

## MOONYA COMPASS COURSE

All points consist of a 2 foot long white ¾ inch PVC pipe with a cap. Each point will have a point number written on the camp as well as on the side of the pipe. Inside of each PVC pipe is a ½ inch metal conduit with the point number written on it. Also in case the PVC pipe is missing, you may find the metal conduit. There are 21 points including the starting point. We have included GPS reading for each point because this is a dual purpose course. Orienteering now requires the knowledge of using a GPS.
